PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/731,632	Applicant(s) JHA ET AL.	
	Examiner Kerri M. Rose	Art Unit 2616	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Drawings

1. The drawings are objected to because figures 10a and b require text labels. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Hayes (US 2003/0158906).

4. In regards to claims 1, 2, and 8 Hayes discloses processing data using an offload device in figures 7 and 12. As described in paragraph 38, if a special case is detected while processing, the offload device transfers the data to the CPU. The CPU then completes the processing using the TCP stack.

5. In regards to claims 3-5, Hayes discloses processing header data (IP) and payload data (TCP, which is considered part of payload) in paragraph 54.

6. In regards to claims 6 and 7, Hayes discloses memory in figure 7. The designation of "user" to "legacy" buffer is semantic and does not affect operation of the memory storage.

7. In regards to claims 9-14, Hayes discloses a system for offload processing in figure 7. Figure 12 illustrates the steps taken by the system, such as determining if a special case exists and processing special cases by the TCP stack.

8. In regards to claim 15, Hayes discloses receiving additional frames while uploading processed frames. Frames will continue to be received unless the input buffer is full. Only then will incoming packets be denied, i.e. dropped. Therefore it is inherent that the offload processor will continue to receive frames that will await processing while it completes processing of its current frame.

9. In regards to claims 16-18, Hayes discloses a method for offload processing. As shown in figure 12 portions of the received data are evaluated. Depending upon certain conditions the data are sent to different areas for complete processing.

Art Unit: 2616

10. In regards to claims 19 and 20, Hayes discloses updating connection state information in paragraphs 57 and 67.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kerri M. Rose whose telephone number is (571) 272-0542. The examiner can normally be reached on Monday through Thursday, 7:00 am - 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Doris H. To can be reached on (571) 272-7629. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
